Taller de programación WEB

HACER UN VIDEO CON EL PROGRAMA FUNCIONANDO

1. Hacer un programa en Javascrip para calcular el índice de masa corporal

Altura en cm (ej: 155) [144]

Peso en kg (ej: 80) [ ]

Edad (ej: 45) [54]

Sexo (H/M/O) [h]

[Calcula] [Reset]

EL INDIICE DE MASA ES :

LA FORMULA ES : IMC = PESO/(Altura)^2

2. Se requiere hacer un programa que muestre las siguiente pantalla

Como puede observar en el programa hay dos vínculos a dos programas. Ud debe hacer que en el programa principal al dar click en las opciones abra el programa nuevo y al darle click regrese regrese al programa principal.

Se le entrega para ello los insumos del programa para que los ensamble de tal forma que se pueda observar el programa funcionando.

Debe enviar un video donde se vea el programa funcionando.

Archivo html principal
